Reliable Cable Solutions for Power, Infrastructure & Industrial Growth

POWERING POSSIBILITIES

About Gulix Cable

Gulix Cable is a growing cable manufacturing company focused on delivering dependable cable solutions for power distribution, industrial projects, infrastructure, buildings and utility applications. The company is built around practical engineering, consistent quality and customer-focused service.

With a product approach aligned to Indian industry requirements, Gulix Cable aims to support contractors, consultants, OEMs, EPC companies, distributors and end users with reliable cable products for safe and efficient electrical installations.

Our Purpose

Vision	To become a trusted cable brand known for quality, reliability and long-term value in electrical infrastructure.
Mission	To manufacture and supply cable products that meet project requirements, support safe installations and deliver dependable performance.
Promise	Responsive service, practical technical support and cable solutions made for real site conditions.

Core Strengths

Quality-focused manufacturing	Project-ready product range
Cable construction planned around applicable standards, consistent materials and routine inspection.	Solutions for LT power, control, industrial and building electrical applications.
Customer-first support	Practical reliability
Support for product selection, cable schedules, project enquiries and dispatch coordination.	Products designed for demanding site conditions, mechanical protection and long service life.

Product Portfolio

Product Category	Typical Application
LT XLPE Power Cables	1.1 kV grade power cables for industrial, commercial and infrastructure distribution systems.
LT PVC Power Cables	PVC insulated power cable options for general low-voltage electrical applications.
Control Cables	Multi-core control cables for panels, relay circuits, automation and machine control wiring.
Armoured Cables	Mechanical protection for direct burial, cable trays, ducts and heavy-duty installations.
Un-armoured Cables	Flexible routing options for protected installations and indoor electrical distribution.
Custom Project Requirements	Construction, sheath type, conductor material and packaging as per approved requirement.

Industries We Serve

Industrial plants • Commercial buildings • Residential projects • Infrastructure projects • Utilities • EPC contractors • OEMs • Electrical contractors • Distribution networks • Panel builders

Quality Approach

- Raw material and in-process checks for consistent product output.
- Dimensional inspection for conductor, insulation, sheath and overall cable finish.
- Electrical testing such as conductor resistance, insulation resistance and voltage withstand as applicable.
- Clear cable marking, drum identification and dispatch documentation.
- Continuous improvement approach for better service, reliability and customer satisfaction.

Why Choose Gulix Cable?

Reliable Supply	Support for regular and project-based cable requirements.
Technical Clarity	Product information and selection support for customer enquiries.
Flexible Options	Conductor, insulation, armouring and sheath options as per application.
Business Commitment	Focused on long-term customer relationships and timely communication.
